

An architectural rendering of a school building is shown on a white background. The rendering includes a floor plan and a perspective view of the building. A black pen is positioned diagonally across the bottom center of the rendering. To the left of the rendering, there is a vertical strip of colorful fabric swatches in various shades including red, orange, yellow, green, blue, and purple. In the bottom right corner, there is a logo for Mooreco Construction and the South Hunterdon Regional School District logo.

MOORECO  
CONSTRUCTION

**South Hunterdon PK-4  
September 13th, 2023  
Revised Design 4**

At MooreCo, we have been designing and manufacturing classroom and office furnishings since 1985. Our products continue to evolve with time as our design philosophy follows human behavior and the interaction with one another regardless of age. Our goal is to provide furnishings which result in comfortable and stimulating environments where children and adults alike feel inspired.

MooreCo Design Team focuses on form as well as function, as we know that a more aesthetic environment brings many people a sense of calm and harmony that leads to focus, uncluttered thinking, greater productivity, and overall job satisfaction.

We offer many in-house design services, to include space planning, furniture design and customization, as well as fabric palette suggestions for our line of soft seating pieces.

MooreCo has furnished a countless number of classrooms, libraries, offices, and other spaces around the country, each with its own unique solution and style to meet the needs of those that will live, work, learn, and play in these spaces.

Since the 1950's, MooreCo has been dedicated to conducting business with integrity, caring for our communities and respecting our environment. Through sustainability initiatives, MooreCo endeavors to be a responsible corporate steward of the environment and, whenever possible, encourages eco-friendly business practices.

We look forward to working with you to create your perfect environment!

## Spiritual

Spiritual development refers to one's connection with the human spirit. Practices like mindful breathing, journaling, or finding community with others can lead to a sense of harmony. Design has proven to also influence this sense of harmony. Spaces designed for music, art, and meditation are essential to lifelong spiritual growth. Using color, natural lighting, biophilic design, and the arrangement of furniture, rooms can be made to help increase one's sense of spiritual harmony and inner peace, even in schools or the workplace.

## Intellectual

Intellectual development refers to the ability to comprehend, reason, and make decisions. Each learner and worker may thrive differently depending on their specific needs and learning abilities. Early adolescence is a period of heightened neuroplasticity. Experts suggest that balanced environments that provide both collaborative and individual space will help students expand their critical thinking, problem solving, and thrive.

## Moral

Moral development is not just a foundational understanding of the difference between right and wrong. Young students and those in the workforce confront the daily challenge of wanting to feel included and fully accepted. From a design perspective, creating environments that foster inclusion comes from providing space and accessibility for everyone, so that environments are not only functional for all, but project a sense of belonging.

## Social-Emotional

Social-emotional development refers to the awareness of one's own and others' emotions and feelings. Being able to recognize, regulate, and move through emotions in school or the workplace can reduce conflict and lead to a happier workplace or learning environment. Those who are adept at social-emotional literacy, or "soft skills" as they are often referred to, demonstrate greater capacity for leadership through empathy, communication, and conflict resolution skills.

## Psychological

Human psychological development evolves throughout a lifetime and can be affected by events and circumstances. Trauma, isolation, bullying, and inequity can all influence a student's ability to learn and grow optimally. When students are in tune with their emotional and mental state, they are better able to navigate the world around them. Experts suggest that students thrive in multifunctional spaces that blend a traditional classroom structure that provides support, while providing some level of independence and personalized workspaces.

## Physical

A healthy body is the key to a healthy mind. Physical development is an important consideration for any designer. This includes ergonomically-sound furnishings that will help preserve the health of everyone, as well as tools that will help adequately stimulate, support, and provide comfort to learners, educators, and workers with differing needs and abilities.

Julianna Calogero  
Space Planner

## Project Management Team

With a combined 56 years of MooreCo experience, our Project Management Team's goal is to make sure your project and experience with us is a success. Our team will provide a disciplined approach throughout the process to plan, develop, control, and deliver a successful job. Once your PO is submitted, a dedicated Project Manager will initiate a call for an introduction of all stakeholders, to begin planning and to understand the timeline for the job. They will provide weekly updates to you to keep you informed that we are on schedule or of any changes or improvements. You will receive order acknowledgements, installer packets which details the components for all items (including colors, fabrics, images, etc...), assembly instructions, pallet layout, truck layout, and delivery updates. We will continue to work through the install process with you, whether you use our team of installers or your own.

Jennifer Keaton
