WHAT DO YOU ENJOY MOST ABOUT TEACHING?

The thing that I love most about teaching is seeing the growth that my students make throughout the year. helping my students adapt to the classroom, routines, building relationships, and reaching academic milestones. The most fulfilling aspect of my job is seeing my students excited to be at school everyday and happy about their accomplishments.

“I want to help children develop a love for learning and community.”

It is a teacher’s job to nourish their students with peer relationship building and academics through powerful lessons, strong questions, and collaborative activities.

WHAT IS THE MOST IMPORTANT THING YOU HOPE STUDENTS LEARN FROM YOU?

*I hope my students learn how to be a good citizens in the world! **Be kind.** Have an open mind by listening to other people’s perspectives. **Work hard.** Keep trying and persevere. I hope they try to challenge themselves everyday because that's how we learn who we are and what we are capable of.*

“I always want the atmosphere in my classroom to feel like we are a little family in here.”

We live in here together for a little while, we help each other, work hard and help each other problem solve and grow together! I also want my students to know that it's okay if they make mistakes and Ms. Szeplaki and I make mistakes because that is how we learn.
